

CNUSD

BRING YOUR OWN DEVICES

Corona-Norco Unified School District recognizes and embraces the pivotal role of technology within our schools and District communities in today's global society. The District uses educational technology as one way of enhancing our mission to teach the skills, knowledge and behaviors students will need as responsible citizens in the global community. In an effort to increase access to 21st century skills, the District will allow for the use of personal devices on our BYOD network and school grounds for students.

The use of personal devices by students is optional, and students who do not participate in the Bring Your Own Device ("BYOD") program will not be penalized and alternate modes of participation will be available. Please visit our Centennial High School website to read through all the documents for more information about the CNUSD BYOD program that is coming to Centennial High School. We will begin a soft roll out during the 2019/2020 school year. More information to come.
